Avg "normal" DAILY WORLD Mortalities v COVID: Reported Daily Deaths

(Linear Scales)

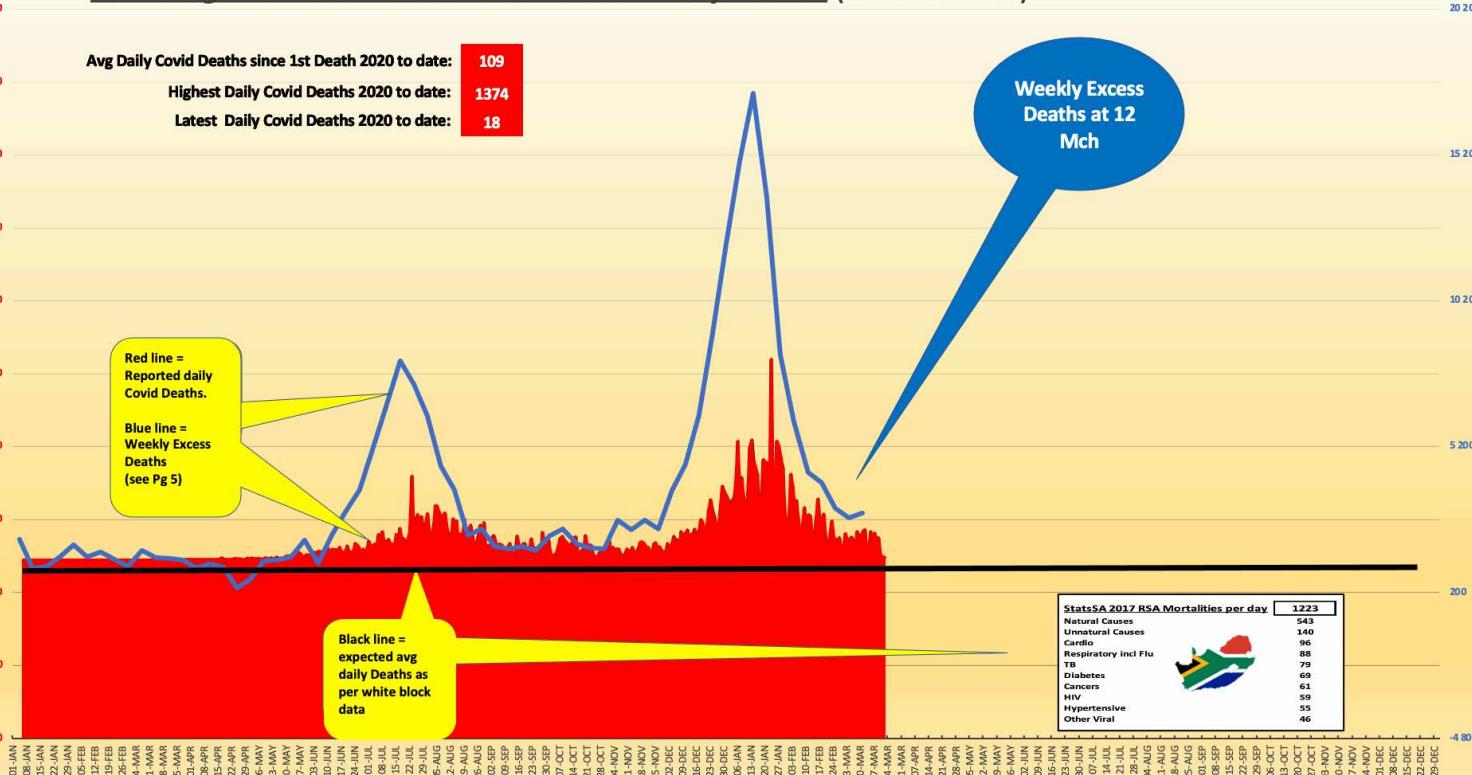

The two graphs WORLD (above) and RSA (below) attempt to put the number of Covid Deaths into some sort of perspective graphically.

The big RED blocks are TOTAL Daily Avg Deaths from ALL causes over a full calendar year.

The RED area/lines on top of the red blocks are the INCREMENTAL Actual Daily Deaths due to Covid as officially reported.

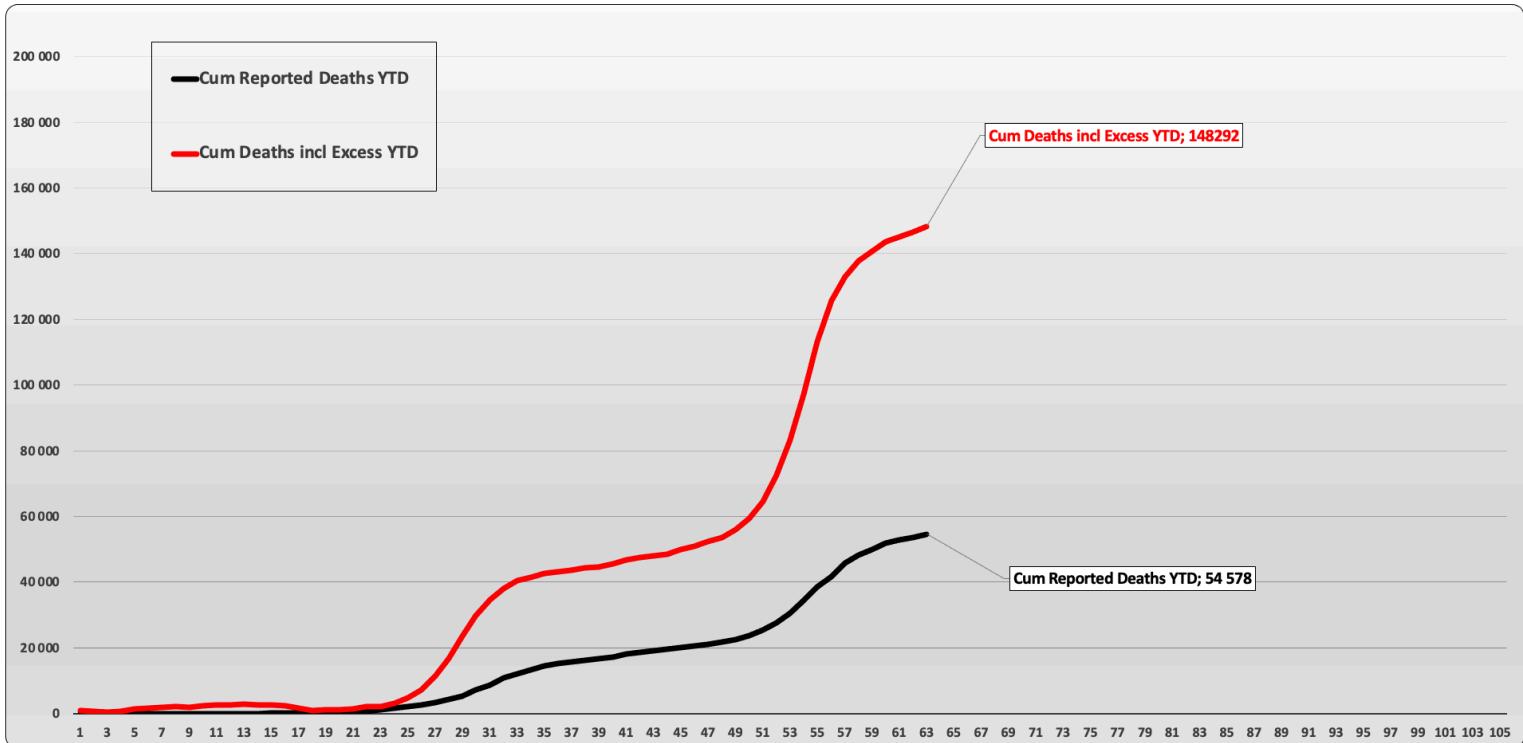

The BLUE line in the bottom RSA graph shows the SAMRC Excess Deaths weekly numbers.

2017 Avg DAILY RSA Mortalities v COVID Daily Deaths (Linear Scales)

Covid Deaths: Reported v Excess Deaths

Cum Totals up to Week ending: 12 March 2021

(See Pg 5 for more details on RSA Excess Deaths)

Projected Deaths by end Mch 2021 per country and % Deaths of Country Populations at current officially reported Death Numbers as reported by WHO (no "Excess" deaths)

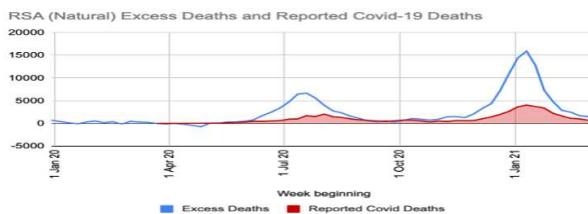

RSA Excess Deaths as per SA Medical Research Council

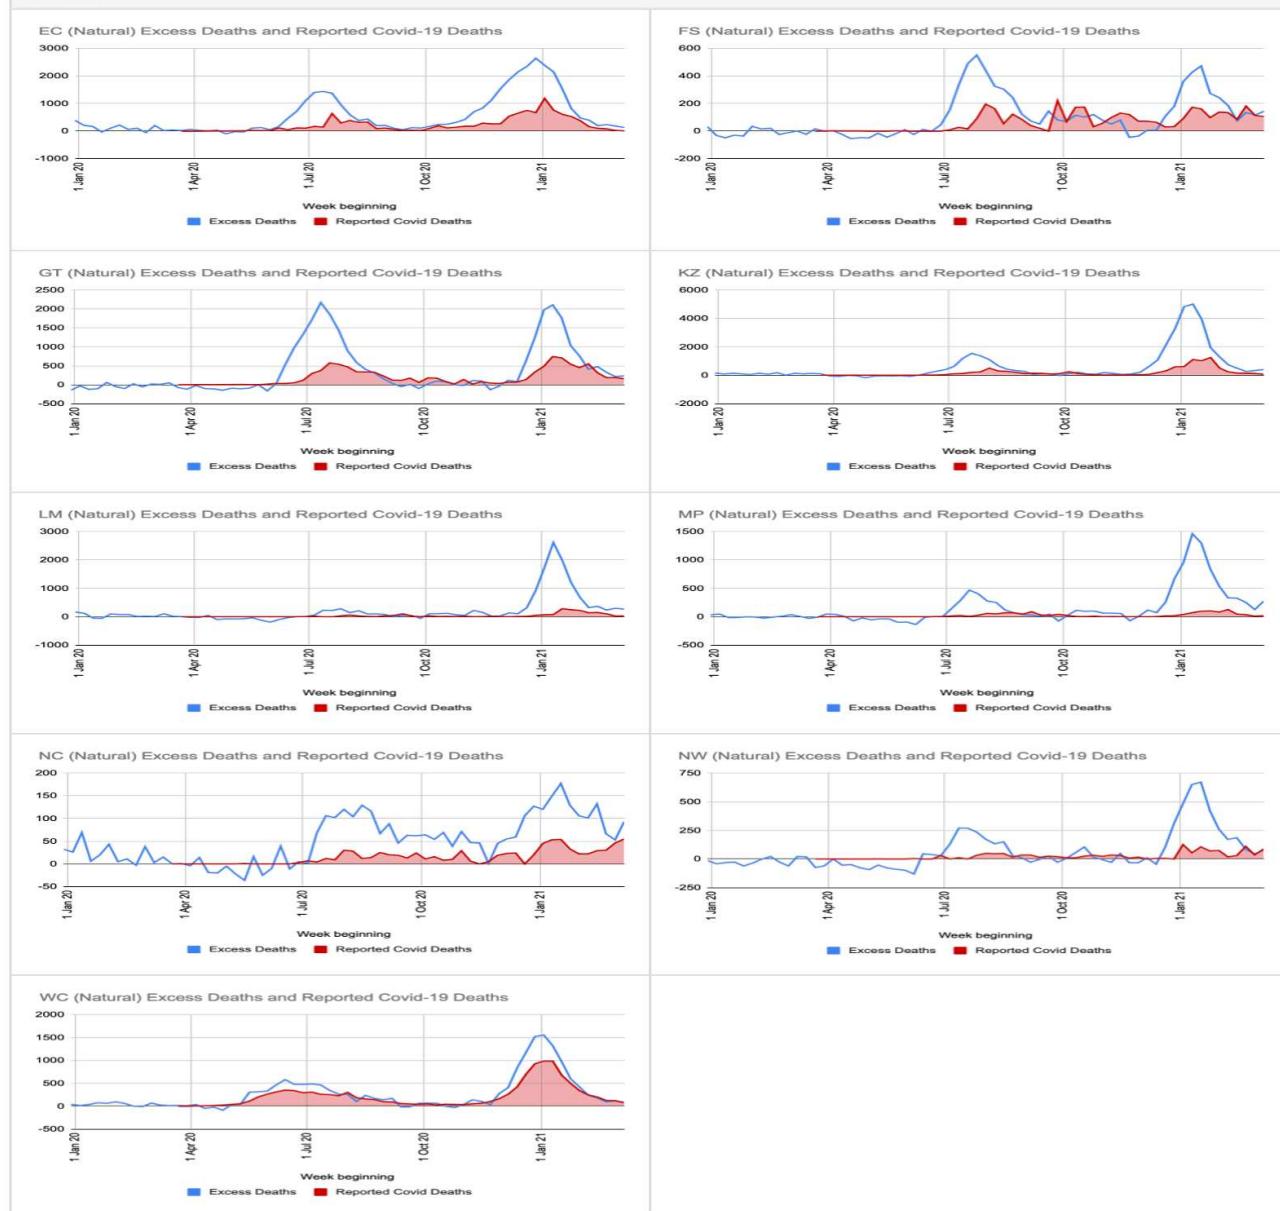

Data as at:

12 March 2021

One approach to aid understanding of the emerging COVID-19 mortality is to compare the estimated weekly excess deaths with the number of COVID-19 deaths reported by the Minister of Health as shown in the figure below. This comparison is hampered to some degree by the fact that the excess deaths are classified by week in which the death occurred; the reported COVID-19 deaths are classified by date the numbers are reported to the Department. If all excess natural deaths were due to COVID-19, and all COVID-19 deaths were perfectly identified and reported, the two series would be identical. The number of estimated excess deaths has begun to decrease, consistent with the trend in the number of confirmed COVID-19 deaths. Although more data are needed on the underlying causes of death, this observation is strongly supportive that a significant proportion of the current excess mortality being observed in South Africa is likely to be attributable to COVID-19.

Provinces

The red lines are weekly Covid deaths as reported by Dept of Health.

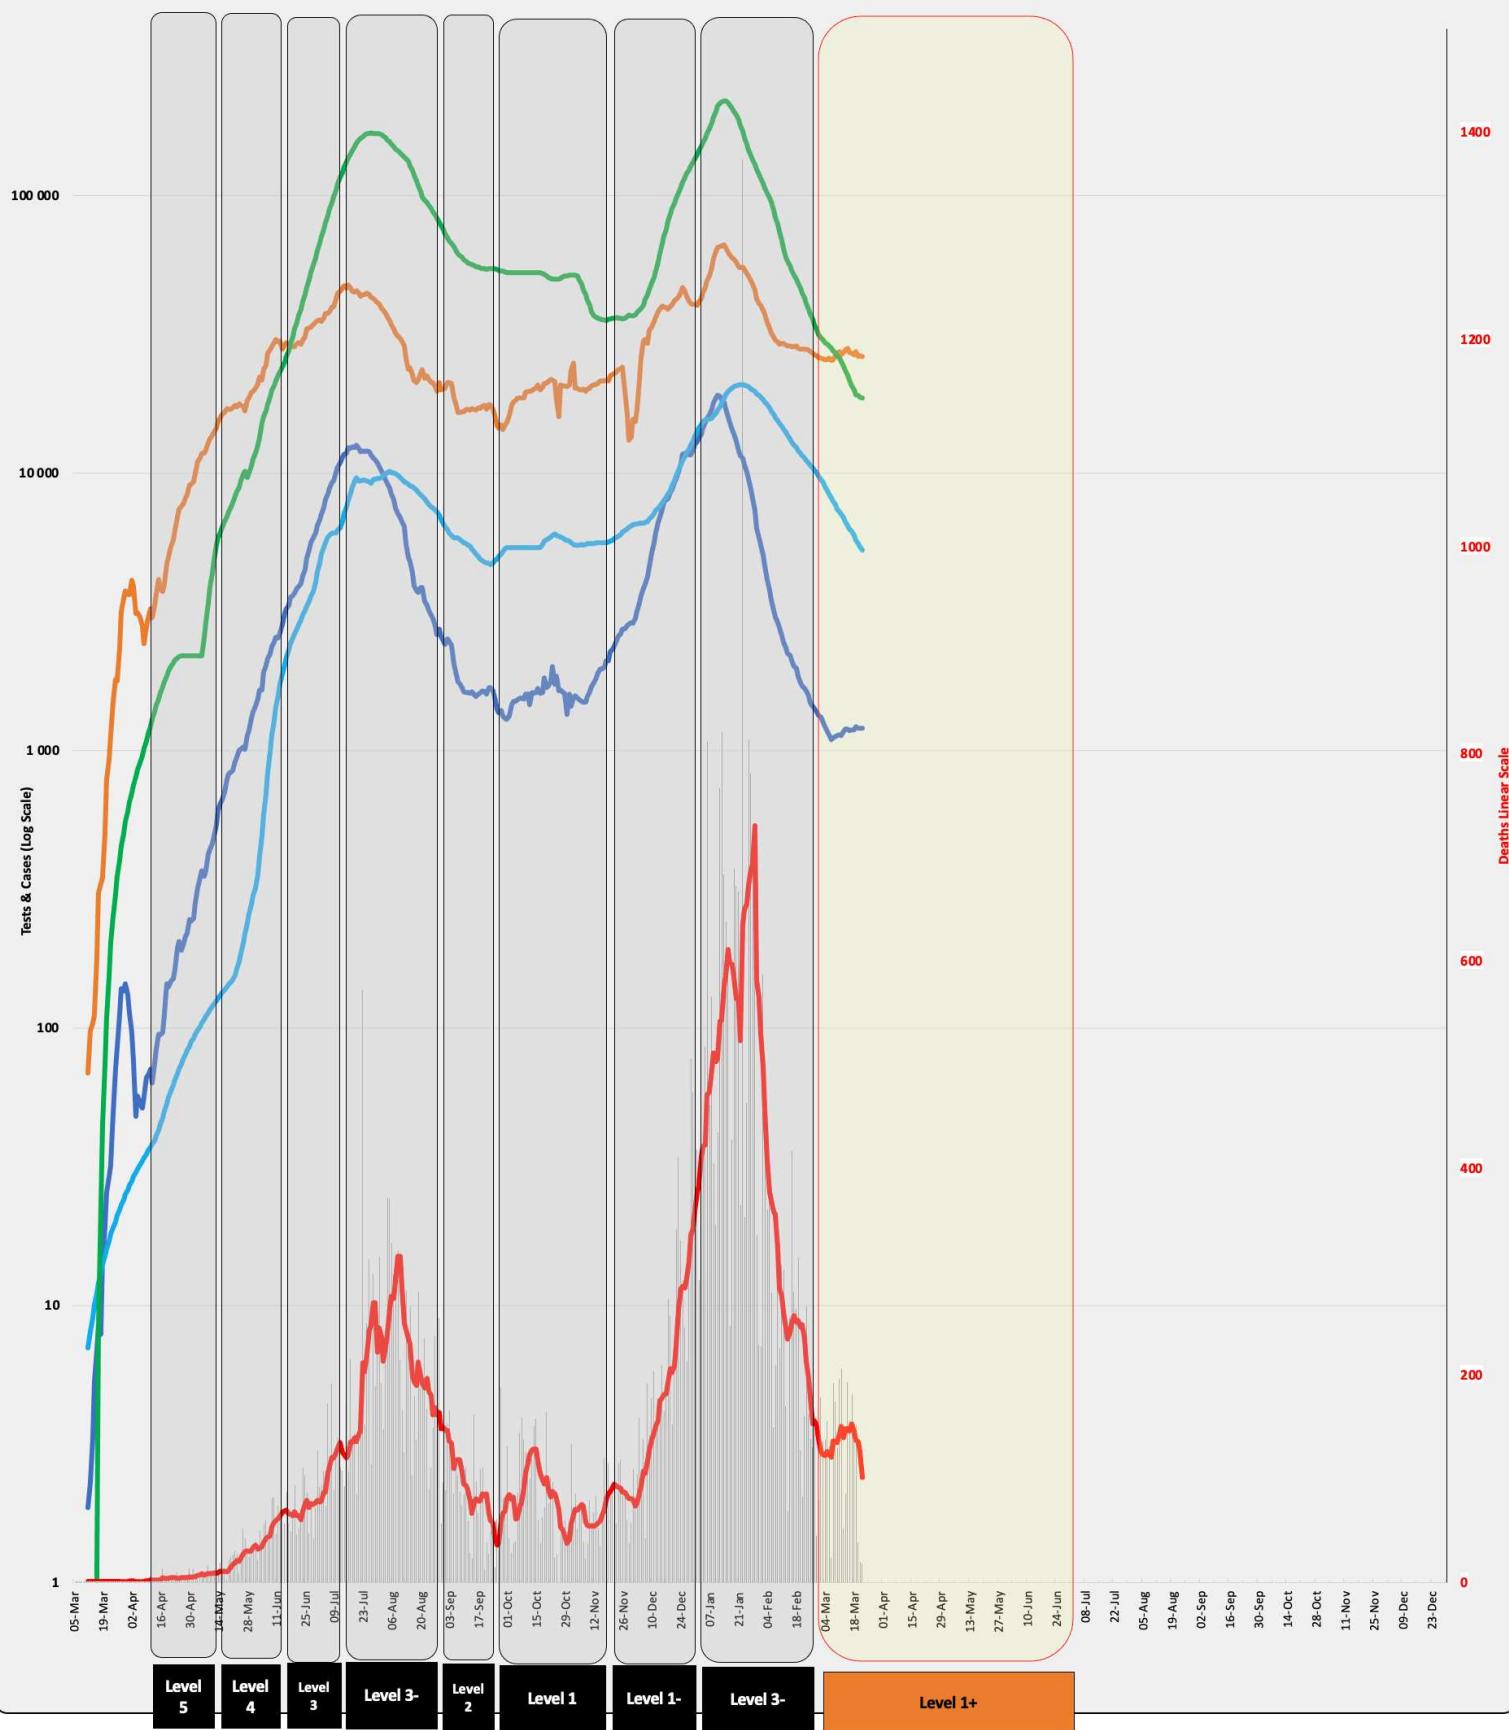

The blue lines are total Natural Deaths as reported by Dept of Home Affairs.

The gaps are the socalled "Excess Deaths" which can largely be ascribed to Covid, directly (home/rural deaths) and indirectly (limited access to hospitals due to fear of Covid or no space).
