Page 1

Cum +Cases	Daily Cases	RSA COVID-19 DASHBOARD			Daily Still in Hospitals	% of Reported Cum Cases who Died (CFR)	Cum Recoveries	
1 516 262	1 447	03 March 2021			8541	3,51%	1 434 772	
Still Active +Cases	Cum Cases p mill PoP	Cum Deaths p mill PoP			% of RSA PoP who have died to date (PMR)		94,6%	
28 263	25 566	Cum Deaths Daily			0,090%			
Deaths Avg Age	Deaths Min Age	Deaths Max Age	Cases	Deaths	CFR	Vaccinations: Total to date & Past 24hrs	Cum Tests Daily Tests	
62,3	0,2	105	Female : 57,8%	51,8%	2,87%	83570	9 147 524 33 498	
			Male : 42,2%	48,2%	3,66%	7533	Deaths Median Age 60,7	
							Daily Positivity Rate: 4,3%	

RSA Rt

Prev 2 :	.73
Prev 1 :	.74
Latest :	.75

An R0 below 1 suggests that the number of cases is shrinking, possibly allowing societies to open back up. An R0 above 1 indicates that the number of cases is growing, perhaps necessitating renewed lockdowns or other measures.

7 Day Moving Average of Daily Reported Deaths & Cases by World Region

Page 3.0

RSA Deaths (CFR), Recoveries (RR) and still-Active Cases as % of all Cases

World Deaths (CFR), Recoveries (RR) and still-Active Cases as % of all Cases

The two graphs WORLD (above) and RSA (below) attempt to put the number of Covid Deaths into some sort of perspective graphically.

The big RED blocks are TOTAL Daily Avg Deaths from ALL causes over a full calendar year.

The RED area/lines on top of the red blocks are the INCREMENTAL Actual Daily Deaths due to Covid as officially reported.

The BLUE line in the bottom RSA graph shows the SAMRC Excess Deaths weekly numbers.

Covid Deaths: Reported and Excess Deaths

Cum Totals to date & Projections for end March 2021 (weekly SAMRC data)

(See Pg 5 for more details on RSA Excess Deaths)

As at Week ended: 28 February 2021

Projected Deaths by end Mch 2021 per country and % Deaths of Country Populations at current officially reported Death Numbers

Data as at: 03 March 2021

hdg 03 March 2021

RSA Excess Deaths as per SA Medical Research Council

Data as at:

28 February 2021

One approach to aid understanding of the emerging COVID-19 mortality is to compare the estimated weekly excess deaths with the number of COVID-19 deaths reported by the Minister of Health as shown in the figure below. This comparison is hampered to some degree by the fact that the excess deaths are classified by week in which the death occurred; the reported COVID-19 deaths are classified by date the numbers are reported to the Department. If all excess natural deaths were due to COVID-19, and all COVID-19 deaths were perfectly identified and reported, the two series would be identical. The number of estimated excess deaths has begun to decrease, consistent with the trend in the number of confirmed COVID-19 deaths. Although more data are needed on the underlying causes of death, this observation is strongly supportive that a significant proportion of the current excess mortality being observed in South Africa is likely to be attributable to COVID-19.

Provinces

The red lines are weekly Covid deaths as reported by Dept of Health.
 The blue lines are total Natural Deaths as reported by Dept of Home Affairs.
 The gaps are the socalled "Excess Deaths" which can largely be ascribed to Covid, directly (home/rural deaths) and indirectly (limited access to hospitals due to fear of Covid or no space).
